JG-Originalschicht VERNETZT mit der übrigen hebräischen Bibel – Komplette Wortkettenkonkordanz + Besprechung auffallender Begleitassoziationen. – zum angegebenen Datum.

Kurzversion! – Übernahmen aus Ziff. 2.6 + 2.7 von *jpguebers.pdf*.

Im Internet – Adresse dieser Kurzversion 9.5:

<http://www-ct.informatik.uni-tuebingen.de/daten/jguebers95.pdf>

Vollversion (Begründungen und Literatur):

<http://www-ct.informatik.uni-tuebingen.de/daten/jguebers.pdf>

Tipps: Am hebräischen Text einzigartige Nachschlagemöglichkeit für die Querverweise der Original-JG zur übrigen hebräischen Bibel. Der JG-Text wird in größerer Type geboten; anschließend die dazu gehörenden Wortketten im restlichen AT.

Für Weiterverarbeitung in *wissenschaftlichem* Kontext **diese Version nicht verwenden**, sondern immer nur das große Manuskript!

Zum doppelt geschriebenen Titel: wir bevorzugen »Josefsgeschichte«. In der alttestamentlichen Wissenschaft dominiert aber »Josephsgeschichte«, entsprechend wird diese Schreibung auch bei *Google*-Suchen verwendet. Um dabei »im Spiel zu bleiben« wurde der Titel verdoppelt . . .

Die aktuelle KURZVERSION 9.5 stellt die Ergebnisse des Suchlaufs mit CoMOn an der Originalschicht zur Verfügung. Ähnlich bequem, vollständig und übersichtlich wird man die *intertextuellen Befunde* an anderen Texten kaum je vorfinden.

In einem zweiten Schritt werden die auffallendsten dieser Befunde besprochen. Aber dies kann nur ein Einstieg sein. Die Konkordanzbefunde sind zweifellos noch umfassender auswertbar. Im »Heuhaufen« (= Ziff. 2.6) sind noch mehr »Perlen« versteckt, als bislang in Ziff. 2.7 sichtbar gemacht.

Die Analysen zur Josefs Geschichte gibt es in *Vollversionen* (aktuell bzw. archiviert [zum angegebenen Datum]) und – als Auszug aus der je aktuellen Vollversion – in einer Reihe von **Kurzversionen**.

Die (jeweils aktuelle) VOLLVERSION ist ein eigenes, kohärent lesbares, intaktes Manuskript. *Zusätzlich* verstehen wir sie als *Datenbank*, der einzelne Informationspartien entnommen werden können. Dies rechtfertigt sich nur, wenn eine Art *Mehrwert* der Kurzversionen daraus resultiert.

Ein solcher *Mehrwert* liegt nicht nur in der größeren *Handlichkeit* der jeweiligen Kurzversion, wenngleich dieser Aspekt nicht zu verachten ist angesichts von bald 4000 Seiten der Vollversion . . ., sondern er liegt im Zuschnitt der jeweiligen Ausgabe auf *eine ausgewählte Fragestellung* hin.

- Öfters werden dafür weiter auseinanderliegende Passagen der Vollversion kompakter kombiniert, bisweilen auch integriert = ineinander gemischt, so dass bestehende gedankliche Zusammenhänge besser sichtbar werden.
- Naheliegender: Man möchte den langen, kohärenten und kunstvollen Erzähltext für *eine* Fragestellung, für *einen* Verwendungszweck heranziehen. Dafür ist es unnötig, all die anderen Themenstellungen und Abhandlungen auch noch zu übernehmen.

Die *Orientierung* im Manuskript, das *Verweisen auf es / Zitieren* sollte immer die **Kapitel-, Abschnittsbezeichnung zugrundelegen, nie die Seitenzahlen**. – Wer in dieser Weise eine KURZVERSION heranzieht, kann sicher sein, damit bei gleichem Datum den Datenstand der VOLLVERSION zu treffen. In Literaturangaben bitte nur die Vollversion nennen (mit Datumsangabe)!

Alle Kurzversionen werden per Programm aus der *je aktuellen* Vollversion neu erzeugt. Folglich gibt es keine gedanklichen 'Überhänge', inkonsistente = veraltete Daten. Die Texte der jeweiligen Abschnitte sind *identisch zum jeweiligen Datum* – durch alle Versionen hindurch.

Was an Kurzversionen verfügbar ist, sei hier vorgestellt. Zum Wechseln genügt es, in der Webadresse die Schlussziffer abzuändern:

Kurzversion 0: Originale Josefsgeschichte in Übertragung

<http://www-ct.informatik.uni-tuebingen.de/daten/jguebers0.pdf>

Orientierung: Ohne irgendwelche Zusatzinformationen wird der Text der *literarisch freigelegten originalen* Josefsgeschichte in einer freieren Übersetzung = *Übertragung* geboten. Nichts soll ablenken. Die Erzählung ist wieder in ihrem ursprünglichen Zuschnitt lesbar.

Kurzversion 1: Mit Stammtischreaktionen

<http://www-ct.informatik.uni-tuebingen.de/daten/jguebers1.pdf>

Orientierung: Ursprungsversion der Josefsgeschichte in einer Übersetzung nah an der hebräischen Sprachstruktur, verbunden **mit hinzugedichtetem Auditorium**. Letzteres liefert einerseits notwendige Zusatzinformationen (gestützt auf die wissenschaftlichen Analysen – für Präzisierungen bitte im Essay zu Ziff.1 der Vollversion nachschlagen! – Der *Essay* ist auch in Kurzversion 2 enthalten.), hilft andererseits, den aktuellen Text *literarisch aufmerksam zu lesen*. Dadurch soll auch eine hinderliche Scheu und Ehrfurcht vor dem biblischen Text abgebaut werden. Durch Interaktion der 4 Sprecherrollen soll der »Ton« des Textes, die Emotionalität, die die Textstruktur beim Wahrnehmen auslöst, angedeutet werden. Da diese Textebene beim Lesen biblischer Texte meist übersehen wird, verfällt man zu häufig dem Missverständnis, der jeweilige Text wolle *informieren*, könne *sachlich* befragt werden. Das Zueinander der Rollen macht sichtbar, dass der Text primär Gefühle, Gedankenverbindungen und ihre Verarbeitung wachruft. Was letztlich daraus entsteht, ist noch ungesagt. – Damit kann/soll das Interesse an einer intensiveren, ganzheitlicheren Beschäftigung mit dem biblischen Text gefördert werden. *Sprechakte und ihre Wirkung* stehen der primitiven und unhaltbaren Gleichung: 'Text = Wirklichkeit' entgegen:

Kurzversion 1.1: Mit Stammtischreaktionen

<http://www-ct.informatik.uni-tuebingen.de/daten/jguebers11.pdf>

Orientierung: Ursprungsversion der Josefsgeschichte – wie bei KURZVERSION 1. Nun wird aber für jeden Lesenden – LEKTOR, HÖRER(1), HÖRER(2), GELEHRTER – eine eigene Version ausgedruckt, mit Markierung der jeweiligen Sprecherrolle. Das erlaubt es – *privat oder öffentlich* – die originale Josefsgeschichte *leicht mit verteilten Rollen zu lesen / vorzutragen*. Die Erzählung gewinnt dadurch weiter an Lebendigkeit.

Separat, ins große Ms integriert (dort unter Ziff. 3.7), gibt es eigene Textausgaben für jeden der 4 Sprecher-Typen:

Lektor::	http://www-ct.informatik.uni-tuebingen.de/daten/jguebers11-1.pdf
Hörer(1)::	http://www-ct.informatik.uni-tuebingen.de/daten/jguebers11-2.pdf
Hörer(2)::	http://www-ct.informatik.uni-tuebingen.de/daten/jguebers11-3.pdf
Gelehrter::	http://www-ct.informatik.uni-tuebingen.de/daten/jguebers11-4.pdf

Kurzversion 2: Josefsgeschichte streng und informativ

<http://www-ct.informatik.uni-tuebingen.de/daten/jguebers2.pdf>

Orientierung: Ursprungsversion der Josefsgeschichte **in strenger**, d.h. besonders eng an der hebräischen Sprachstruktur orientierter **Übersetzung, verbunden mit dem Essay** aus Ziff. 1 des großen Manuskripts. Sprachlich-grammatisch, literarisch, methodentheoretisch, hermeneutisch und historisch – um nur die wesentlichen Akzente zu nennen – werden viele Aspekte für das analysierende Verständnis des Textes geboten. – »Zusammenfassende Interpretation«. – Aus »6. Ausklang« von *jguebers.pdf* sind die abschließenden Übersichtscharakterisierungen des Textes angehängt.

Kurzversion 3: Endtext = Original-JG + Redaktionen

<http://www-ct.informatik.uni-tuebingen.de/daten/jguebers3.pdf>

Orientierung: Josefsgeschichte als *biblischer Endtext*, als »kanonische Version« (= **Ursprungserzählung + redaktionelle Additionen**), im Zuschnitt wie in den gängigen Bibelausgaben – in der etwas freieren Übersetzung aus Ziff.1 von *jguebers.pdf*. *Aber: Zusätzlich sind die von uns erkannten literar(krit)ischen Brüche eingezeichnet*. Durch Unterschied in der Schriftgröße/Einrückung kann man erkennen, welche Passagen der Ursprungsversion angehören, welche dagegen späteren redaktionellen Überarbeitungen. Wer will, kann an der eigenen Lektüreerfahrung testen, wie solch ein Textkonglomerat wirkt. Es werden auch diverse Übungs-/Beobachtungsvorschläge gemacht.

Kurzversion 4: Keine JG; Materialien zur Interpretation

<http://www-ct.informatik.uni-tuebingen.de/daten/jguebers4.pdf>

Orientierung: Jede Textbeschreibung und -interpretation muss *reflektiert* erfolgen. Geschieht dies nicht, drohen entweder Willkür der Auslegung oder ausgesprochen *fundamentalistische* Missverständnisse. Beides ist fruchtlos, ja gefährlich und ver-dummend. – Seit der Antike ist das Nachdenken über Sprache, Grammatik, Textinterpretation im Gange, und auch in jüngster Zeit ist die Debatte und Erweiterung der Beschreibungsmöglichkeiten lebendig. Daran kann man anknüpfen. – Die **Kurzversion 4** trägt aus verschiedenen Teilen von *jguebers.pdf* die Passagen zusammen, die sich mit derartigen **Theoriefragen** beschäftigen.

Kurzversion 5: Ur-Josefsgeschichte – AUF HEBRÄISCH

<http://www-ct.informatik.uni-tuebingen.de/daten/jguebers5.pdf>

Orientierung: Wie die anderen Versionen/Übersetzungen in die selben Äußerungseinheiten gegliedert – was die Verständigung = Nachschlagbarkeit/Verweise erleichtert. Zudem größere Drucktype als in *jguebers.pdf*.

Kurzversion 6: Methode »Literarkritik« – Illustration

<http://www-ct.informatik.uni-tuebingen.de/daten/jguebers6.pdf>

Orientierung: Am Beispiel des Anfangs der Josefsgeschichte (Gen 37) – *auf Deutsch* – wird die Vorgehensweise der neukonzipierten Literarkritik – vgl. auch unseren *wikipedia*-Artikel dazu – praktisch und Schritt für Schritt vorgestellt. Ebenso: Übersichtsergebnisse zur Josefsgeschichte.

Kurzversion 7: Ur-Josefsgeschichte AUF LATEIN

<http://www-ct.informatik.uni-tuebingen.de/daten/jguebers7.pdf>

Orientierung: Diese Vulgata-Version – auch hier die redaktionellen Überarbeitungen eliminiert – kann als spannende Erzählung im Lateinunterricht verwendet werden – die biblische Endtextversion ist wegen der massenhaften Zusätze dafür nicht geeignet; daran ändert auch das *Latein* nichts . . . Übernommen aus Ziff. 3.5 der Vollversion.

Kurzversion 7.1: Ur-Josefsgeschichte AUF FRANZÖSISCH

<http://www-ct.informatik.uni-tuebingen.de/daten/jguebers71.pdf>

Orientierung: Übersetzung der wörtlichen deutschen Fassung – einschließlich Beachtung der Äußerungseinheiten. Übernommen aus Ziff. 3.1 der Vollversion.

Kurzversion 7.2: Ur-Josefsgeschichte AUF ENGLISCH

<http://www-ct.informatik.uni-tuebingen.de/daten/jguebers72.pdf>

Orientierung: Übersetzung der wörtlichen deutschen Fassung – einschließlich Beachtung der Äußerungseinheiten. Übernommen aus Ziff. 3.2 der Vollversion.

Kurzversion 8: Ur-Josefsgeschichte/ HEBRÄISCH – Sprechakte/Tempus

<http://www-ct.informatik.uni-tuebingen.de/daten/jguebers8.pdf>

Orientierung: In der Hebraistik ist die Kontroverse alt, wie eine verlässliche *Tempusinterpretation* durchzuführen sei – Frage der Verbfunktionen, Nominalsätze, Aspekte, Modalitäten usw. – Wir vertreten die These im »Interpretationskonzept 'Mithilde'«, dass durch verschiedene Satztypen (in Kombination mit Konjugationsformen – bei Verbalsätzen) zunächst einmal **Sprechakte** angezeigt sind. Damit hängt zusammen, welche *Modalitäten* im Spiel sind. »Sprechakte« und »Modalitäten« sind zu trennen! Die Frage des **Tempus** wird über Einbeziehung auch weiterer Indizien geklärt. »Sprechakte« – allerdings in von uns neu konzipierter Form.

Kurzversion 8.1: Ur-Josefsgeschichte/ GRIECHISCH – LXX

<http://www-ct.informatik.uni-tuebingen.de/daten/jguebers81.pdf>

Orientierung: Motivation ist es zu sehen, wie der kanonische Endtext, also einschließlich der Brüche, die durch redaktionelle Erweiterungen entstanden waren – vgl. KURZVERSION 3 – von einem Übersetzer bewältigt wurden, der von dieser Fragestellung noch nichts ahnte – die Brüche aber intuitiv spürte, spüren musste. Die Auswirkung der redaktionellen Nahtstellen lag nicht im Ermessen des Übersetzers. Intuitiv *musste* er auf derartige Brüche reagieren, auch wenn ihm ihre Ursache nicht bewusst geworden war.

Es ist sogar wahrscheinlich – das sei ohne Karikatur gesagt –, dass intuitives Bemerkens einer Störung mit dem Gedanken weggedrängt wurde, man habe es ja doch mit einem 'heiligen' Text zu tun, wohl also mit einem Tiefsinn, der noch zu ergründen sei . . .

Es kommen weitere übersetzungstechnische Aspekte hinzu: Sprach(*familien*)verschiedenheit, Eigeninteressen des Übersetzers, Einfluss/Nicht-Einfluss der gesamten Textstruktur auf die Einzellösung. Die Betrachtung der LXX-Josefsgeschichte konzentriert sich auf das *erste* Beispiel in der dann folgenden langen Kette der Texttradition.

Kurzversion 9.1: Ur-Josefsgeschichte/ Auswertung – Grafiken I

<http://www-ct.informatik.uni-tuebingen.de/daten/jguebers91.pdf>

Orientierung: Zwei Grafiktypen aus der zusammenfassenden Interpretation werden synoptisch präsentiert. Einerseits geht es um Befunde (aus 6.73). Dann aber schon um die Frage, welche *diskursive Stoßrichtung* diese inhaltlichen Aspekte haben (aus 6.74). *Fortführung in Kurzversion 9.2.*

Kurzversion 9.2: Ur-Josefsgeschichte/ Auswertung- Grafiken II

<http://www-ct.informatik.uni-tuebingen.de/daten/jguebers92.pdf>

Orientierung: Kurzversion 9.1 weiterführend interessiert, welche Dynamik die Josefsgeschichte in ihrer Entstehungszeit ausgelöst hat. Es war wohl ein Wechselbad von Faszination und Protest. Dem JG-Autor war bewusst, was er in Gang setzen werde – diverse Anspielungen zeigen es deutlich.

Kurzversion 9.3: Ur-JG/ AT-Korpusanalysen

<http://www-ct.informatik.uni-tuebingen.de/daten/jguebers93.pdf>

Orientierung: Anderes Stichwort: **INTERTEXTUALITÄT**. Die Josefsgeschichte entstand nicht als Solitär, sondern im Kontext vieler weiterer Texte, von denen nicht wenige in heutigen Bibelausgaben noch erhalten sind. Mit ihrer Hilfe können Querverbindungen nachgewiesen werden, die einerseits die sprachliche Prägung des JG-Autors zeigen, aber auch gewollte/bewusste Anspielungen – um die Textwahrnehmung im Sinn des JG-Autors zu steuern. Damit wird zusätzlich erkennbar, wie sich der JG-Autor innerhalb der literarischen Tradition positioniert – oft im *Kontrast* zur schon 'geheiligten' Überlieferung. Die – 'Kanonisierung' folgt erst etwas später – unter Einbeziehung der dann aber bereits kräftig redaktionell umgearbeiteten JG.

Kurzversion 9.4: REDAKTIONEN/ AT-Korpusanalysen

<http://www-ct.informatik.uni-tuebingen.de/daten/jguebers94.pdf>

Orientierung: Nochmals Stichwort: **INTERTEXTUALITÄT** – nun aber im Zusammenhang mit den nachträglichen Überarbeitungen der Erzählung. Manchmal steuern eben auch die Redaktoren mit *längeren* Wortketten nachvollziehbare Verweise auf externe Texte bei. Dadurch wird besser erkennbar, welche Motive und welche geistige Herkunft die Bearbeiter prägten.

Kurzversion 9.5: Original-JG / Wortkettenkonkordanz

<http://www-ct.informatik.uni-tuebingen.de/daten/jguebers95.pdf>

Orientierung: *Einzeltextbezogen* werden lückenlos die Befunde der *Wortkettenkonkordanz* aufgelistet (wogegen 'Konkordanz' üblicherweise lediglich Einzelworte, *tokens*, als Grundlage hat – mit zusätzlichen 2 Nachteilen: (a) das Einzelwort (z.B. Verb) wird auf die 'Grundform' reduziert, (b) es wird auch schon 'inhaltlich' vorsortiert). – Im Gegensatz dazu bei uns streng an den *Ausdrücken* orientiert: Es werden einzelne interessante Begleitassoziationen (auf expliziten Wortketten beruhend) besprochen. – Entspricht Ziff. 2.6 und 2.7 in der Vollversion.

Kurzversion 9.6: Typisierung der Redaktoreingriffe

<http://www-ct.informatik.uni-tuebingen.de/daten/jguebers96.pdf>

Orientierung: Mehr Klarheit in die sekundären Teiltexthe zu bringen, ist eine schwierige Aufgabe. Wir haben in Ziff. 4 der Vollversion mehrere flankierende Untersuchungen durchgeführt und für 5 *Typen von Redaktoren* Folgerungen gezogen. Wieviele reale »Hände« sich dahinter verbergen, ist eine unbeantwortbare Frage. Sicher wird sich hierbei noch manches verschieben. Aber die gebotene Klassifizierung ist schon recht breit abgesichert. – Auch diese Kurzversion wird immer auf dem aktuellsten Stand gehalten. – Entspricht mehreren Punkten aus Ziff. 4 der Vollversion. *Kurzversion 96* erspart umständliches Nachschlagen bei der Lektüre von Ziff. 4.

SUCHFUNKTION – im *acrobat reader* (oder einem vergleichbaren Programm), sie lässt sich natürlich nutzen, um gezielt Befunde zu einzelnen Fragestellungen zu erheben. Dabei darauf achten, *wie die Suchanfrage formuliert* ist – auch auf *Leerstellen (blanks)* achten! Vorausgesetzt ist im Fall von *Kurzversionen* natürlich, dass die gesuchte Information dort überhaupt enthalten ist. . . **Sicherer:** Für Suchläufe die *Vollversion* nehmen! Ein und der selbe thematische Bereich kann *verschiedene Suchtypen* erfordern. – Beispiele:

Delila – als Suchbegriff im Suchfenster eingegeben – liefert die Stellen, wo der Eigenname explizit im Text verwendet wird.

lila – wer ahnt, dass es unterschiedliche Wiedergaben gibt, kann den Eigennamen *abgeschnitten* eingeben – und erhält damit beides – *Dalila* bzw. *Delila*. Natürlich könnte auch die Farbbezeichnung unter den Treffern sein. Sie muss dann eben übergangen werden.

Ri 16 – im Suchfenster eingegeben – zeigt an, wo das biblische Kapitel (in dem »Delila« auftritt) – gleichgültig ob mit oder ohne folgende Versangabe – im Erläuterungstext genannt ist. Die Kapitelzahl folgt *nach* Leerzeichen.

[RI16 – im Suchfenster eingegeben, in diesem festen Format – liefert die *Konkordanzbefunde* zum selben Kapitel.

ZITIEREN / LITERATURANGABE: Verweis auf die **VOLLVERSION** etwa wie folgt. **KURZVERSIONEN** nicht verwenden, sondern in wissenschaftlichem Rahmen immer nur die *Vollversion* – möglichst die jeweils *aktuelle* – angeben. Die Daten entsprechen sich:

Sich verändernde, je aktuelle Textgestalt:

SCHWEIZER, H Josefsgeschichte/Josephsgeschichte. (Version vom [Datum!]):

<http://www-ct.informatik.uni-tuebingen.de/daten/jguebers.pdf>

Wie erwähnt: Bezugnahme auf einzelne Passagen immer nur via **Kapitel-, Abschnittsbeifferung**, also z.B. *Ziff. 3.3*. Dadurch bleibt die Vergleichbarkeit unterschiedlicher Versionen erhalten. Auf *Seitenzahlen* dagegen ist kein Verlass: sie verändern sich.

DRUCKEN: Die Datei ist schon im Querformat angelegt. Bevor Sie drucken, beachten Sie in der DRUCKVORSCHAU, ob zwei Seiten auf einer Druckseite richtig dargestellt werden. Wahr-

scheinlich müssen Sie zusätzlich – bei EIGENSCHAFTEN-FERTIGSTELLUNG – auf »Querformat« stellen.

Nicht alle Druckprogramme arbeiten in gleicher Weise. Daher am besten *eine Probe* zu Testzwecken drucken!

EINLADUNG ZUM ÜBERSETZEN: *Ziff.3 = Anhang 1* bietet die Originale Josefsgeschichte in verschiedenen Sprachen. Eingangs von *Ziff. 3* wird dazu eingeladen, dieses *Angebot zu erweitern*, den Text also in weiteren Sprachen anzubieten. Wenn Sie daran Interesse haben,

– lesen Sie bitte die erste Seite von *Ziff.3*,

– nehmen Sie Kontakt auf mit: *h.schweizer.moess@web.de* – dabei können weitere praktische Fragen geklärt werden.

Übersetzt wird die Version in *Ziff. 3.3* – für jede weitere Sprache im selben Format präsentiert, also auch mit der gleichen Zählung. Der Name der/des Übersetzerin/s wird natürlich genannt werden.

EINLADUNG ZU BEITRAG:

Das Manuskript enthält schon Beiträge anderer Autoren (z.B. zu THOMAS MANN). Wer aufgrund spezieller Qualifikation einen eigenen Beitrag beisteuern möchte, sei dazu eingeladen. Er/sie nehme Kontakt mit H. SCHWEIZER auf.

Das Gesamtmanuskript samt der Extraktion der KURZVERSIONEN wird mit TUSTEP, dem »Tübinger System von Textverarbeitungsprogrammen« erstellt – ein bewundernswert komplexes *tool*, mit dem nicht nur Fragen der *Edition* bearbeitet werden können, sondern – zuvor – schon solche der *Gewinnung von Analysedaten/-ergebnissen*. Letzteres in anderen Fällen auch mit externen Programmen – erstellt von Studierenden der Informatik im Rahmen von Qualifikationsarbeiten. Aber TUSTEP bewährt sich sehr gut bei derart hochkomplexen Fragestellungen zum Thema »Text«, letztlich – als 'Spitze des Eisbergs' – bei der Bündelung zum edierten Text. Herzlichen Dank daher – auch für viele Einzelberatungen – an PROF. DR. WILHELM OTT und Herrn KUNO SCHÄLKLE, auch stellvertretend für weitere Mitarbeiter der Abteilung am universitären Rechenzentrum. – Für Hilfestellungen bin ich auch verschiedenen Mitarbeitern der Informatik-Fakultät dankbar. Die Komplexität der Technik zwingt zu Kommunikation – ein schöner Seiteneffekt.

Die in die *Kurzversionen* übernommenen Passagen stimmen immer mit den betreffenden Abschnitten in **jguebers.pdf** (aktuelle Version) überein. Gibt es in letzterem, im 'großen' Manuskript, Korrekturen, werden sie im gleichen Zug automatisch in die Kurzversionen übernommen.

Für Hinweise auf die Notwendigkeit von Korrekturen bin ich dankbar. Bitte senden an:

2.6 Korpusverweise – Neu: *String-Konkordanz*

Wie die Stichwörter der Überschrift anzeigen, werden zwei Typen von Informationen in diesem Kapitel angeboten. Beide haben *Neuheitscharakter* – sicher weit über die atl. Exegese hinaus:

Zum Aspekt **Neuheit** trägt – *vorbereitend* – bereits bei, dass das Thema »Konkordanz« verknüpft wurde mit dem Thema »Abgrenzung des Einzeltextes« (= revidierte Literarkritik) – Abgrenzung also nicht nur von anderen, umgebenden Texten, sondern Unterscheidung von originaler Text und redaktionellen Bearbeitungen. Diese Fragestellung ist vielleicht in anderen Literaturen häufig nicht von großer Relevanz, im Fall biblischer Texte jedoch höchst bedeutsam, weil nachträgliche redaktionelle Überarbeitungen bei der Textüberlieferung Standard waren.

Durch die vorherige *literarkritische* Analyse können unrealistische Konkordanzbefunde vermieden werden, weil die Konkordanz am überprüft *homogenen* Text gewonnen wird, also keine *literarischen Brüche* überbrückt werden (Redaktoren pflegten meist, sprachlich rücksichtslos ihre Einträge zu machen, was dann, wenn nicht nur nach Einzelworten, sondern nach Ketten gesucht wird, im Bereich der Bruchstellen oft zu 'harten' Befunden führen würde).

Nun aber zu den eigentlichen Merkmalen der *String-Konkordanz*:

1. Am Untersuchungstext entlang werden die Wortketten aufgelistet, die sich im restlichen Korpus auch noch finden. Es sind die Befunde, die auch dem vorigen Kapitel – »2.5 Datierung« – zugrundeliegen. Da *Ketten* interessieren, werden Fundstellen für einzelne *tokens* nicht aufgelistet – dazu kann man die gängigen Wörterbücher und Konkordanzen heranziehen. Wird ein isoliertes Wort genannt, so ergibt es sich daraus, dass umliegend Ketten mit externen Fundstellen erkannt worden waren, in die das aktuelle Wort eben nicht integriert ist. »—— ———« zeigt an, dass eine Kette exklusiv so nur in der JG vorkommt. Da sich Ketten innerhalb der JG wiederholen (z.B. Redeeinleitungen), werden die dazugehörigen z.T. sehr umfangreichen

Befunde ebenfalls wiederholt. Bequem hat man folglich an jeder JG-Textstelle das komplette Verweisrepertoire zur Verfügung.

2. Die *String-Konkordanz* ist ein Arbeitsmittel neuen Typs. Bisherige Konkordanzen (ob gedruckt oder elektronisch) sind auf Einzelwörter ausgerichtet. Und wenn die Fundstelle noch durch ein wenig Kontext illustriert wird, ist dies in keiner Weise vergleichbar mit der *String-Konkordanz*: es wird nicht mit Einzelwortsuche + zufälliger Kontextangabe gearbeitet. Sondern die ganze Kette ist Suchkriterium. Sie findet sich genau so an den angeführten Stellen. Bitte beachten: Das Programm suchte zunächst nach der längst möglichen Übereinstimmung. Wenn z.B. eine Kette der Länge »5« irgendwo nochmals belegt ist, so wird diese zuerst genannt. Dann wird die 5er-Kette in Teilketten zerlegt: kommen Bestandteile der langen Kette als 4er-, 3er- oder 2er-Kette vor? Auch diese Treffer werden alle aufgelistet.

In geringem Maß enthalten nachfolgende Daten manche Unausgeglichenheiten. Sie rühren daher, dass der Original-Text der JG zunächst ja per Hand herauspräpariert werden musste. Und auch die Weiterverarbeitung der gewonnenen Daten unterlag noch dem Testcharakter. Wir arbeiten an der Optimierung – möglichst integriert in CoMOn.

Schließlich noch der Hinweis: *Dageš forte* wird durch doppelte Schreibung des Konsonanten wiedergegeben.

Die *originale Josefsgeschichte* findet sich anschließend immer *rechtsbündig, in größerer Schrift*. Sie ist komplett wiedergegeben – nur kann es sein, dass das Ende einer Wortkette als Anfang der nächsten Wortkette wiederholt wird. Diese 'Aufsetzpunkte' müssen also in Kauf genommen werden.

linksbündig, in *kleinerer Schrift* stehen die anderswo nachweisbaren Ketten (mit Stellenangaben), oder eben der Hinweis darauf – durch »— — —«, dass eine Kette exklusiv nur hier in der JG vorkommt. Mit gleichem Zeichen können auch Einzelwörter markiert sein, die durch den Zusammenbau der umliegenden Ketten isoliert werden.

In Ziff. 2.5 waren die folgenden Daten statistisch verarbeitet worden. Man kann aber schon kursorisch interessante Beobachtungen anstellen, indem man z.B. die Befunde zu Gen 41 vergleicht mit denen zu anderen Kapiteln. Das Zeichen für 'Exklusivkette' kommt hier wesentlich häufiger vor. Und das in einem Bereich, der – nun *inhaltlich* – die Wende darstellt: Josef ergreift beherzt seine Chance. Bislang war er Verfolgter, Verkannter.

Kursorisch sieht man als Teilbefund auch, wo eine Wortkette sich *innerhalb der Josefs Geschichte* nochmals findet. Dazu müsste man noch eine Sortierung einbauen, denn die Verweise auf Stellen in Gen 37–50 unterscheiden nicht zwischen *original* vs. *sekundär*.

Als Fragestellung kommt das Stichwort »Homogenität« in den Blick: es darf/muss angenommen werden, dass ein und der selbe Autor in allen Bereichen des Textes seine spezifischen Sprachgewohnheiten einsetzt, die ihn – teilweise wenigstens – von anderen Autoren unterscheiden.

Das berührt sich zumindest mit der Untersuchung, die BADER in SCHWEIZER (1995,1) veröffentlicht hat: »Interne Syntax« meint dort die Verteilung der Einzelwörter innerhalb der Original-

schicht. Das ist noch nicht die Untersuchung von *Wortketten*. Kann aber doch zeigen, dass die Distribution der »inhaltlich wichtigen Wörter« (vgl. 40) direkt zur »inhaltlichen Struktur des gesamten Textes« führt.

Zugleich ist zweierlei einzuräumen: Der BADER-Beitrag ist ein wichtiger Schritt zur Analyse des Einzeltextes auf Ausdrucksebene, auch wenn die »Ketten«-Betrachtung noch fehlt. Bei der Interpretation – das betrifft auch die Mitwirkung von SCHWEIZER – stand aber doch noch stark die Erwartung im Hintergrund, die statistischen Befunde müssten die Inhaltsinterpretation stützen. Lässt man – wie inzwischen getan – diese doppelte Beschränkung weg, lassen sich »Datierung« oder »Homogenität« ganz eigenständig angehen. Inhaltsstrukturen sollten allein aufgrund von Inhaltsanalysen erkannt werden.

Erinnert sei an **Ziff. 5b** oben, in der »Einleitung«. Die dort mit *link* genannte *Entropie*-Untersuchung erlaubt auf der Basis von Verkettungen eine Überprüfung der literarischen Homogenität des Textes. Ergebnis: überzeugend.

2.7 Einzelwortketten und ihr assoziativer Beitrag

In Ziff. 2.5 und 2.6 war unser Interesse die *Datierung* der Josefs-geschichte gewesen. Dazu wurde der Blick auf *ganze biblische Kapitel* gerichtet. Daneben – darum soll es jetzt gehen – sollte es für möglich gehalten und entsprechend überprüft werden, dass Einzelwortketten punktuell interessante Begleitassoziationen wecken. Folglich sollte auf diese speziellen Verweise geachtet werden.

Eine Neuerung ist dieser Schritt nicht, denn er hat – mit der software *Tustep* als Basis – einen leuchtenden Vorläufer in SCHINDELE, »Externe Syntax« in: SCHWEIZER (1995) 42–88. Die Befunde dort sind ausführlicher dargestellt und besprochen als jetzt. Unsere jetzige Ziff. 2.7 hat sozusagen die Funktion eines *aide-mémoire*, erleichtert auch den Zugang zu den einschlägigen Daten (es sind ja doch nur wenige, die schnellen Zugang zur gedruckten Fassung haben). Eine Zusatzkenntnis gegenüber (1995) ist, dass der Schwellenwert, der *unbewusste* von *bewusster* Kettenverwendung trennt, nämlich »Mindestlänge 3« sich weiter bestätigt. Diese Unterscheidung hatte damals noch keine größere Rolle gespielt.

Erfreulich, was WENDLAND (1997) bezogen auf das Buch Jona demonstriert: ein großer Teil seines Aufsatzes würde bei uns zur Rubrik »Ausdrucks-SYNTAX« zählen, und zwar *textintern* wie auch – das interessiert im Moment – *intertextuell*. In beiden Hinsichten liefert das Buch auf der Ebene der Ausdrücke interessante Befunde, die – in einem zweiten Schritt erst – *narrativ*-inhaltlich ausgewertet werden können. Die deutliche *methodische* Trennung beider Ebenen hat nicht damit zu tun, ob die Konkordanzarbeit in Buchform oder elektronisch vollzogen wird. In beiden Fällen weist die Konzentrierung auf die *Ausdrucksebene* darauf hin, dass sie zunächst eigens zu beachten und als Eigenwert zu würdigen ist.

Grundlage bleibt die frühere Annahme, dass Wortketten einer Länge von 3 und höher zunehmend *bewusst gewollte* Querbezüge zu anderen Texten erzeugen.

Die Frage, ob dieser Schwellenwert auch in andere Sprachen übernommen werden kann, benötigt eine eigene Diskussion, die die Struktur der *Ausdruckseite* der Sprachen berücksichtigt. *Konkret*: Manches Wort im Hebräischen würde im Deutschen durch *drei* separate Wortformen wiedergegeben. Hinsichtlich der Verteilung unter-

scheidbarer Bedeutungen auf Wortformen formuliert das Hebräische kompakter als das Deutsche. Es ist also möglich, dass in einer anderen Einzelsprache der Schwellenwert höher angesetzt werden muss. – Und nebenbei zeigt die Skizzierung der Fragestellung sehr schön, wie klar die Unterscheidung von *Ausdrucksseite* und *Semantik* durchgeführt werden kann und muss.

Nur addieren wir nun nicht sämtliche Bezüge eines Kapitels, sondern gehen einzelnen Wortketten nach und besprechen sie kurz. Es zeigt sich: unsere Annahme bewährt sich. – Auch wo nachfolgend nicht explizit davon die Rede ist: häufig finden sich weitere Ausführungen zur jeweiligen Wortkette im *Essay* (Ziff.1) z.St.

Methodisch ist wieder das Stichwort »Intertextualität« einschlägig, oder man fragt sich, ob eine aufzuführende Wortkette als »bewusstes Zitat« oder als eher »unbewusste Anspielung« zu verstehen sei, ob gegenüber dem Referenztext jetzt die »Funktion« der Kette gleichgeblieben oder charakteristisch verändert wurde, usw. Einen Überblick über die neuere Literatur hierzu, auch Begriffsklärungen, liefern HOHL TRILLINI und QUASSDORF (2010). Die Autoren wollen mit dem Gegensatz: »bewusst vs. unbewusst« nicht operieren. Im Sinn einer klaren Trennung tun wir das auch nicht, sehr wohl aber – in Abhängigkeit von der Kettenlänge – im Sinn einer wachsenden Wahrscheinlichkeit: je länger, je bewusster. Und unterhalb der Länge »3« muss man von »unbewusst« ausgehen. – Im übrigen verstärkt der Artikel die Freude über unseren Ansatz: unsere *software – CoMoN* ist so flexibel, dass sie selbst erkennt, bis zu welcher Länge Ketten übereinstimmen. Nach der vollautomatischen Korpusanalyse, ausgehend von der Josefs Geschichte, drängen sich die Befunde direkt auf mit der Frage, ob die »Funktionen« im Referenztext oder jetzt in der JG vergleichbar sind. Häufig sind sie es nicht, weil z.B. ironisch gebrochen u.ä. Die Zitate/Anspielungen dienen meist nicht der Absicherung, sondern der Kritik.

וַיֵּאמְרוּ אִישׁ אֶל אַחֵיו הַגּוֹי [2KON7,6]

Die erste von zwei **Fünferketten** geht von Gen 37,19ab aus und bindet einen erzählerisch völlig überzogenen, witzigen, den eigenen Stadtkönig als unfähig bloßstellenden Elischa-Text ein. – Er ist oben im Essay in Ziff. 1) zu Gen 37,19a ausführlicher beschrieben.

אִם נָא מִצְאֵי חֵן בְּעֵינַי [GEN18,3] [GEN30,27] [GEN33,10] [EX33,13] [EX34,9] [RI6,17] [1SAM27,5]

Die einzige **Fünferkette** der originalen JG (**Gen 47,29d**), die noch *mehrfach* woanders begegnet, und dann gleich in 7 weiteren Texten. Die Worte des sterbenden ISRAEL sind die gleichen, die ABRAHAM beim Besuch der drei Männer (Gen 18,3) benutzt, um sie einzuladen. Die Irritation, ob es sich um 3 Männer, 1 Mann, einen Engel oder womöglich Gott handelt, ist wohl der »Mittagshitze« (V.1) geschuldet. Jedenfalls ist für das Ableben ISRAELS dieser Querbezug zu ABRAHAM durchaus passend: ISRAEL ist dabei, in eine andere Wahrnehmungs- und Seinsform überzuwechseln.

In Gen 30,27 ist Laban dabei, Jakob aus seinen Diensten zu entlassen. Das »Entlassen«, Abschiednehmen, passt durchaus. Nicht mehr jedoch, dass Laban in diesem Kontext von Jakob übers Ohr gehauen wird . . . – Laut Gen 33 versöhnt sich Jakob mit Esau. Jakob nimmt seine Frau Lea und deren Kinder, und eben Rahel samt Sohn Josef, mit zum Gespräch. Esau nennt die Versammlung despektierlich »Auftrieb«. – Ex 33,13: Bundeserneuerung in der Wüste. Mose bittet mit der Wortkette = Formel, Jahwe möge doch den weiteren Weg für sein Volk wissen lassen. – Ex 34,9: »Er (=Mose) sagte: *Wenn ich deine Gnade gefunden habe*, mein, Herr, dann ziehe doch mein Herr mit uns. Es ist zwar ein störrisches Volk, doch vergib uns unsere Schuld und Sünde . . .« – Kontext: Erneute Gabe der zwei Steintafeln an Mose (mit dem »kultischen Dekalog« als Inschrift). – Ri 6,17: Jahwe beauftragt GIDEON, als Heerführer die Midianiter zu schlagen. Mit der Formel bittet GIDEON um ein Zeichen um sicher zu sein, dass tatsächlich Jahwe der Auftraggeber ist. – 1 Sam 27,5:

David, verfolgt durch Saul, läuft zu den Philistern über. Mit der Formel bittet er den Philisterfürsten um einen Aufenthaltsort – und erhält Ziklag.

Fazit: Der Autor der JG lässt mit Hilfe der Formel am sterbenden ISRAEL die bedeutendsten Figuren der Volksgeschichte vorbeifilieren – via Assoziation. Zugleich bestätigt der Vater die dominierende Rolle Josefs – ist es doch auch sonst der Mächtige, gar Gott, der bittend mit der Formel angesprochen wird.

וַיֹּאמֶר יִשְׂרָאֵל אֶל יוֹסֵף [GEN46,30] [GEN48,11] [GEN48,21]

Gen 37,13a: Mit dieser Redeeinleitung, der ein Handlungsauftrag folgt, verliert Vater ISRAEL seinen Sohn für lange Zeit aus dem Blick. Mit der selben Redeeinleitung – als *narratives* Strukturelement – bekommt er ihn in 46,30 wieder zu Gesicht. Die Viererkette strukturiert somit ein wesentliches Merkmal des Textes, hilft, den Bezug über eine weite Strecke herzustellen. – Anders die beiden Belege von Gen 48: da wir wissen, dass das gesamte Kapitel sekundär ist, handelt es sich um zwei Imitationen.

וַיֹּאמְרוּ אִישׁ אֶל אָחִיו [GEN42,21] [EX16,15] [NUM14,4]

Gen 37,19a: Die Stelle war weiter oben schon als *erste Fünferkette* erwähnt worden. Verkürzt auf eine Viererkette kommen weitere interessante Bezüge in den Blick: Der Beschluss, Josef umzubringen – hier die Redeeinleitung dazu – wird durch einen Bearbeiter in Gen 42,21 imitiert. Ansonsten zwei assoziative Bezüge zu Texten vom »Murren in der Wüste«. Ex 16,15: Speisung in der Wüste durch Manna – die Israeliten kennen diesen Typ Brot aber noch nicht. – Num 14,4: Rebellen auf der Wüstenwan-

derung wollen die Bewegung initiieren, für die die Josefs-geschichte ohnehin wirbt: »zurück/hin nach Ägypten«! – Beide Belege zeigen schön – wie die meisten übrigen in diesem Abschnitt auch –, wie gut die wachgerufenen Assoziationen zur Josefs-geschichte passen. Das bestätigt unsere Annahme, wonach gleiche Wortketten der Länge 3 und mehr zunehmend *bewusste, gewollte, konstruierte* Bezugnahmen darstellen. Es handelt sich nicht mehr um Standardsprachgebrauch, der nichts inhaltlich Spezifisches zur Josefs-geschichte beisteuert.

פְּרַעַה וַיֹּאמֶר פְּרַעַה אֶל [GEN47,2 – GEN47,3] [GEN47,7 – GEN47,8]

Gen 41,14f–15a: An dieser Ausgangsstelle der Suche wird Josef zu Pharao gebracht, worauf der die Rede beginnt. In 47,2f ist es Josef, der mit 5 Brüdern selbstbestimmt kommt. Also wieder ein Brückenschlag über eine längere Textstrecke – und welcher atmosphärischer Wandel sich daran festmacht! – 47,7f ist die Imitation eines Bearbeiters.

וַיֹּאמֶר פְּרַעַה אֶל יוֹסֵף [GEN41,41] [GEN41,44] [GEN45,17] [GEN45,17] [GEN47,5]

Gen 41,39a: Die entscheidende Beauftragung Josefs durch Pharaon. In 45,17a Pharaos Fortsetzungsauftrag, den Rest der Familie nach Ägypten zu holen. In 47,5a das definitive Ziel: die Familie darf in GOSCHEN siedeln – die Hungersnot wird weiter eskalieren. – Es liegt am Titel (»Pharaon«) und Eigennamen (»Josef«), dass die 4 Wörter der Redeeinleitung exklusiv in der Josefs-geschichte vorkommen. An der 'geprägten Wendung' lassen sich entscheidende Handlungsetappen ablesen. (Die Belege in 41,41.44 sind Imitationen eines Bearbeiters.)

וּישָׁא עֵינָיו וַיִּרְא אֶת [RI 19,17]

Gen 43,29: Der Exklusivbezug der Viererkette will beachtet sein. Der Hinweis auf die »Schandtät von Gibeä« ist im Essay (vgl. Ziff.1 z.St.) ausführlich ausgewertet.

Der importierte Erzählton ändert sich, wenn man das letzte Glied der Kette weg- bzw. einen dazwischengeschobenen Eigennamen zulässt – Hinweis von SCHINDELE (1995) 63. Dann kommen – ohne Variation – [GEN18,2] [GEN24,63] [JOS5,13] in den Blick, mit Variation weitere Texte, somit die Heroen der eigenen Tradition wie: Lot, Abraham, Jakob, Bileam, Josua, David. Sie bilden eine Folie, vor der sich der namenlose »Mann« (und seine schlimmen Erlebnisse) des direkten Bezuges auf RI 19 geradezu gespenstisch abhebt.

וַיִּשְׂאוּ בְנֵי יִשְׂרָאֵל אֶת [EX14,10]

Gen 46,5b*: Dieser exklusive Bezug zu einer Stelle außerhalb der JG kann nur als *gezielt, absichtsvoll* beurteilt werden: In Ex 14,10 heben – in einer erstarrten Metapher, die die Dauer der Wahrnehmung unterstreicht, Dauer wegen des Erschreckens – die Israeliten »die Augen«: Sie sehen den feindlichen Pharao anrücken, der das Volk wieder nach Ägypten zurückholen will. – Kontrastiv dazu Gen 46,5: Flott wird der Vater auf die mitgebrachten Wagen gepackt, um ihn mit Absicht und Freude nach Ägypten zu transferieren.

וַיִּיאַמֶר יוֹסֵף אֶל אָחָיו [GEN45,3] [GEN45,4] [GEN50,24]

Gen 45,3: Josef muss kurz hintereinander *zweimal* zu den Brüdern sprechen, da sie bei der ersten Selbstvorstellung so konsterniert sind, dass sie nichts verstehen. – Gen 50,24 geht auf das

Konto eines Nachahmers.

וַיִּדְבַּע וַיִּנְעֲבוּ הָעָרֶפּ יוֹנֵעָב [GEN45,16] [EX5,21]

Gen 45,16: vgl. Essay (Ziff. 1) z.St.

אֶת כָּל הַכֹּסֶף הַגּוֹמֵצָא [1KON15,18] [2KON12,10]

Gen 47,14: Vgl. Essay (Ziff.1) z.St.

אֶת כָּל הָרְעָה אֲשֶׁר [1KON2,44] [JER19,15] [JER35,17] [JER36,3] [JER36,31] [JER41,11] [JER44,2] [JER51,60]

Gen 50,15a: Die Betrachtung der Viererketten endet dominierend mit dem Verweis auf *jeremianischen* Sprachgebrauch. Die Brüder Josefs scheinen die Drohreden des Profeten verinnerlicht zu haben – zumindest stellt es der Autor so dar. Die Brüder multiplizieren so ihre Schuld gegenüber ihrem Bruder Josef mit der globalen Schuld, die Jahwe Juda und den Einwohnern Jerusalems vorhält. Indem die Brüder zu Josef gehen, wollen sie offenbar die Lehre aus Jeremias Botschaft ziehen und tatsächlich umkehren, vgl. Jer 36,3.31 – im Gegensatz zu Juda und Jerusalem. »All das Unheil das . . .« – ist auch in Jer 51,60 quasi als Fazit der Botschaft des Profeten zusammengefasst. – Da wir inzwischen ohnehin gesichert wissen, dass die Josefs-geschichte auf die Jeremiatexte bereits zugreifen konnte, da sie *jünger* ist, wird durch die eindeutigen und klar auf Jeremia fokussierten Assoziationen die Schuld der Brüder in ein noch schwärzeres Licht getaucht. – Aber: sie schaffen es ja umzukehren, wozu die Zeitgenossen Jeremias, in dessen Sichtweise, nicht in der Lage gewesen waren.

Es könnte also sein, dass der JG-Autor seine Text-Adressaten an das Wirken des Profeten – mutmaßlich knapp 2 Jahrhunderte früher – erinnert, ihnen anhand des

Sprachgebrauchs den Spiegel vorhält und zeigt, dass man bei der Frage des »Schuldbekenntnisses« auch anders reagieren kann, nämlich offener und selbstkritischer.

Fazit: Die Betrachtung der Verweise auf andere Korpusstellen durch Einzelverweise stoppen wir hier. Der Analyseschritt war in mehrfacher Hinsicht lehrreich:

1. Gefragt hatten wir nach längeren Ketten aus der originalen Josefsgeschichte, für die es irgendwo im AT-Korpus mindestens einen zweiten Treffer gibt. Dieser Doppelbedingung entsprachen Ketten allenfalls bis zur Länge 5. Daher startete unsere Besprechung mit einer der beiden Fünferketten, die extern noch belegt waren.
2. Bei den Viererketten waren nicht nur die Treffer üppiger. Sondern genauso wie bei den Fünferketten zeigte die inhaltliche Betrachtung des jeweiligen Trefferkontextes, dass die anzunehmenden Begleitassoziationen für die Josefsgeschichte höchst sinnvoll und nachvollziehbar waren.
3. Man könnte nun eine weitere Stufe heruntersteigen und die Dreierketten analysieren. Nach Durchsicht der Daten tun wir das aber nur selektiv in ausformulierter Form, denn:
4. Unter den 79 Ketten, die zu besprechen wären, finden sich viele *substrings* längerer Ketten (Viererketten, z.B. Rede-einleitungen). Die Trefferzahl ist natürlich beträchtlich erhöht.
5. Die kursorische Durchsicht zeigt auch: die Schwelle, also die zwischen unbewusstem, grammatisch nötigem Sprachgebrauch und bewusster Kettenverwendung, um gezielte Assoziationen hervorzurufen, liegt wohl ganz richtig bei Ketten der Länge 3: Bereits eine kursorische Durchsicht ahnt, dass auch bei Dreierketten manche aussagekräftige Verweise zu

finden sind. Wenn z.B. die Dreierkette aus Gen 47,6 nur noch in den beiden Dekalogversionen und einer David-Geschichte zu finden ist, kann man dies nicht abtun als Alltagssprachgebrauch.

6. Dieser Erfahrungswert für die Schwelle gilt zunächst für das Hebräische. In anderen Sprachen, mit anderer Struktur (z.B. der Funktionswörter, der Pronomina und Präpositionen – enklitisch oder nicht) kann die Schwelle anders zu positionieren sein (das Deutsche operiert viel mehr mit *separaten* Wortformen als das Hebräische. Folglich müsste der analoge Schwellenwert im Deutschen deutlich höher liegen.)
7. Es seien wenigstens die um die größten Doppelungen bereinigten Befunde zur Verfügung gestellt – nur z.T mit expliziter Analyse: Am Anfang steht – **fettgedruckt** – für die angegebene Dreierkette eine *Belegstelle im Rahmen der ursprünglichen Josefsgeschichte*. Anschließend werden die weiteren Vorkommen der Kette genannt.

Gen 43,11: זאת עשו קחו [GEN45,19] [NUM16,6]

Die Anweisungen Josefs an die Brüder werden durch diese Dreierkette eingeleitet, die außerhalb der JG nur noch beim 'Aufstand der Korachiten' in der hebräischen Bibel vorkommt. Wer beim Hören der JG diesem Verweis assoziativ folgen konnte, den wird es gegruselt haben: Die Korachiten hatten sich in der Wüste gegen Mose und Aaron erhoben mit dem Vorhalt: »Ihr nehmt euch zuviel heraus. Alle sind heilig, die ganze Gemeinde, und er Herr ist mitten unter ihnen. Warum erhebt ihr euch über die Gemeinde des Herrn?« Den kultisch-levitisch ausgerichteten Widersachern bekommt der Aufstand gar nicht gut: »da spaltete sich der Boden unter ihnen, die Erde öffnete ihren Rachen und verschlang sie samt ihrem Haus« (Num 16,32–33). Die Wortkette ist also geeignet, per assoziativen Verweis auf Num 16 Warnung vor Widerrede und massive Vernichtungsängste wachzurufen.

Beim zweiten Vorkommen innerhalb der JG ist es der wohlwollende Pharao, der die Dreierkette ausspricht. Zwar ist die Situation inzwischen viel entspannter – Josef hat seine Identität offenbart, nachdem Bruder Benjamin auftragsgemäß nachgeholt wor-

den war (den Josef überhaupt zum erstenmal zu Gesicht bekam). Es muss als kalkulierte Boshaftigkeit des Autors gewertet werden, dass er den Pharao nun ebenfalls die mit Vernichtungssängsten behaftete Dreierkette sprechen lässt. Der Ägypter – so sollen die Textadressaten folgern – konnte von dieser Nebenbotschaft nichts wissen. Die mit der Moseüberlieferung Vertrauten jedoch vernahmen die Nebenbedeutung: auch der Auftrag, den Vater zu holen, ist mit einem rabiaten Verdammungsurteil 'gewürzt' – man kann es so ausdrücken: die Leser kennen Josefs positive Grundeinstellung zur Familie; nur die Brüder müssen noch etwas gepiesackt werden . . . Josefs Umgang mit den Brüdern nun schon zum dritten Mal mit 'Todesdrohung': 2× durch die Dreierkette, außerdem war ein Bruder als 'Pfand' zurückbehalten worden. Was Josef selbst hatte erleben müssen (Ende Gen 37), ist nun also reichlich 'heimgezahlt'. Die emotionale Aufarbeitung des früher Geschehenen begleitet somit, was im Erzählvordergrund gerade *vernünftig* vereinbart wird.

Gen 41,3: על שפת היאר [EX2,3] [EX7,15]

Zwei exklusive Verweise auf Mose – einmal, als er »am Ufer des Nil« von seiner Mutter im Binsenkörbchen ausgesetzt wurde. Die mit mehr Nachwuchs als die Ägypter gesegneten Israeliten hatten ein Zeugungs-/Gebärverbot erhalten. Daher musste der neugeborene Mose versteckt werden. – Das zweite »am Ufer des Nil« markiert den Wunsch der Israeliten auszuwandern. Man muss aber erst durch allerlei Proben und Wunder dem Pharao die Erlaubnis abringen. Die erste Probe vollzieht sich »am Ufer des Nil« im Kontext der Stäbe, die zu Schlangen verwandelt werden.

Gen 41,33: על ארץ מצרים [EX8,1] [EX8,3] [EX9,23] [EX10,12] [EX10,12] [EX10,13] [EX10,21] [PS81,6]

»über das Land Ägypten« klingt an der JG-Stelle bürokratisch vernünftig: es wird einer »über« einen Verwaltungsapparat gestellt. Die anderen Belege haben einhellig einen drohenden Unterton. Die Hand soll »über« = »gegen« Ägypten im Plagenkontext erhoben werden – auf dass der Pharao endlich mürbe werde und das Volk auswandern lasse. – Für eine umfangreichere Abhandlung der Wortketten mit Kern »Land Ägypten« vgl SCHINDELE (1995) 53ff.

Gen 47,25: הן בעיני אדני [GEN33,8] [GEN33,15]

An beiden Stellen zudem geht ebenfalls eine Form MS' voraus, Hinweis SCHINDELE (1995) 75. – Jakob ringt um das Wohlwollen mit Esau – erhält es dann auch. Josef

erhält es von seiten der Ägypter, die Josef unterwürfig/überschwänglich dankbar sind wegen der Errettung vor dem Hungertod.

Gen 47,19: ונהיה ולא נמות [GEN42,2] [GEN43,8]

Die in der Original-JG späte Dreierkette – die Bewältigung der Hungersnot benötigt ja auch einen längeren Vorlauf – hat offenbar Bearbeitern gut gefallen, so dass sie sie schon in Gen 42; 43 eingesetzt haben. Außerhalb Gen 37–50 kein Treffer.

Gen 41,48: וייקבץ את כל [2SAM2,30] [2CHR15,9]

Mit dieser Dreierkette wird auch beschrieben, dass JOAB nach einer Schlacht seine Leute wieder sammelt – mit der Genugtuung im Rücken, dass man von den Gegnern (Benjaminiten, Abners Leute) 360 Mann erschlagen habe. – In 2 Chr werden die Menschen aus verschiedenen Stämmen nach allerlei Not gesammelt zur Bunderneuerung: viele erkannten jetzt erst den wahren Gott. – Die seltene, insofern auffallende, mit Krieg und Kult/Bekenntnis aufgeladene Wortkette wird in der JG geradezu 'säkularisiert' verwendet, dient also dem Kontrast: Getreide wird eingesammelt. An die Stelle ideologischen Aufheizens tritt realpolitische Vorsorge.

Gen 41,37: ויטיב הדדבר בעיני [JOS22,33] [1KON3,10] [EST1,21] [EST2,4]

Salomo wird von Jahwe positiv für seine Bitte um Weisheit gewürdigt. Auch die beiden EST-Stellen sprechen von der Billigung einer hohen Instanz (König). Insofern passt in der JG die Reaktion des PHARAO.

Gen 42,5: ויבאו בני ישראל [EX14,22] [NUM20,1] [NUM20,22]

»Ex 14,22 beschreibt den Zug durchs Meer bei der Flucht vor den Ägyptern. In Gen 42,5 ist mit gleichen Worten die Gegenrichtung formuliert: Hilfesuchender Zug nach Ägypten. Mit Num 20 kommt zwei mal der Text in den Blick, in dem die »Söhne Israels« einerseits lebensrettendes Wasser aus dem Felsen durch Mose erhalten, andererseits selbst sehr ambivalent gezeichnet sind: sie streiten und meutern. Beides prägt – entsprechend transformiert – an dieser Stelle auch die JG: Lebensrettende Speise wird gesucht bei Josef (Analogie zu Mose?); das 'Streiten' und 'Meutern' war der letzte Eindruck, den Josef von den Brüdern hatte. Jetzt, beim Wiedersehen, knüpft er ab 42,8 daran an.« SCHINDELE (1995) 59.

Gen 37,14: וַיֹּאמֶר לוֹ לֵךְ [1SAM20,40] [1KON19,20] [1KON20,22] [2KON5,19]

Eine Redeeinleitung, wie sie tausendfach im AT anzutreffen ist – so meint man. In diesem Zuschnitt allerdings nur noch 3×. Im Essay von Ziff.1 z.St. wird gezeigt, dass *davidische* und *profetische* Obertöne dadurch ins Spiel kommen.

Gen 40,20: וַיְהִי בַיּוֹם הַשְּׁלִישִׁי וַיֹּאמֶר [GEN34,25] [EX19,16] [2SAM1,2] [1KON3,18] [EST5,1]

Vgl. Essay von Ziff.1 z.St.

Gen 39,22: וְאֵת כָּל אֲשֶׁר [GEN12,20] [GEN34,29] [GEN45,13] [EX9,19] [EX20,11] [EX40,9] [LEV8,10] [NUM4,26] [NUM16,30] [DTN13,16] [JOS2,13] [JOS6,22] [JOS6,23] [JOS6,25] [JOS7,15] [JOS 007,24] [JOS9,9] [JOS9,10] [RI11,24] [2SAM6,12] [1KON2,3] [1KON19,1] [2KON15,16] [2KON20,13] [JES39,2]

Die Wortformen für sich genommen sind schon sehr häufig. In die auch als Kette zahlreichen Belege fließt somit die geballte inhaltliche Leere ein. Die Wortkette kommt einem Funktionsanzeiger gleich.

Gen 42,29: לֹא אֵת כָּל [GEN15,10] [GEN24,36] [JOS2,23] [1SAM19,18] [1KON13,11]

Ähnlich funktional und nahezu leer wie die eben besprochene Kette.

Gen 37,16: הַגִּידָה נָא לִי [RI16,6] [RI16,10] [1SAM9,18] [1SAM10,15]

Vgl. Essay in Ziff.1 z.St.

Gen 39,8: אֲשֶׁר יֵשׁ לוֹ [GEN39,5] [GEN39,5]

Gen 46,31: אֲשֶׁר בְּאֶרֶץ כְּנָעַן [GEN33,18] [GEN35,6] [JOS22,9] [JOS22,10] [RI21,12]
